GROWTH OF \$10,000

Based on a hypothetical Class A Share investment of \$10,000 on 09/30/1988, at net asset value and includes the reinvestment of all distributions. Data as of 12/31/2014.

CALENDAR YEAR TOTAL RETURNS AT NAV (%)

	2005	2006	2007	2008	2009	2010	2011	2012	2013	2014
NAV	8.21	18.12	11.82	-37.33	37.83	11.36	-6.89	15.02	14.66	2.15

Reflects the percent change in net asset value (NAV) of Class A shares and includes the reinvestment of all distributions. Performance is shown for each calendar year. Past performance is no guarantee of future results.

Performance data quoted reflect past performance and are no guarantee of future results. Current performance may be higher or lower than the performance quoted. The investment return and principal value of an investment in the Fund will fluctuate so that shares, on any given day or when redeemed, may be worth more or less than their original cost. You can obtain performance data current to the most recent month-end by calling Lord Abbett at 888-522-2388 or referring to lordabbett.com.

Effective November 29, 2013, the Lord Abbett Global Allocation Fund changed its name to Lord Abbett Multi-Asset Global Opportunity Fund.

¹ Reflects expenses for the Fund's fiscal year end and is subject to change. Fund expenses may fluctuate with market volatility. A substantial reduction in Fund assets (since its most recently completed fiscal year), whether caused by market conditions or significant redemptions or both, will likely cause total operating expenses (as a percentage of Fund assets) to become higher than those shown.

² The Fund has entered into a Servicing Arrangement with the Underlying Funds in which the Fund invests, pursuant to which each Underlying Fund will pay a portion of the Fund's expenses (excluding management fees and distribution and service fees) in proportion to the average daily value of total Underlying Fund shares owned by the Fund.

³ Gross and Net Expense Ratios include Acquired Fund Fees and Expenses.

⁴ Reflects the average net expenses of Class A shares of all funds within the Lipper Flexible Portfolio Funds Category based on Lipper data available.

⁵ The 30-Day Standardized Yield represents net investment income earned by a fund over a 30-day period. It is expressed as an annual percentage rate using a method of calculation adopted by the Securities and Exchange Commission (SEC). Yields for other share classes will vary. The Fund's 30-Day Standardized Yield is shown and reflects fee waivers in effect. Without such fee waivers, yields would be reduced. The 30-Day Standardized Yield unsubsidized is 2.94%.

Without sales charge (NAV): the net asset value performance above shows the Fund's average annual total returns excluding sales charges. If sales charges, including any applicable contingent deferred sales charge (CDSC) had been included, performance would have been lower.

With sales charge (MOP): performance of Class A shares with sales charge reflects the reinvestment of all distributions and includes initial maximum sales charge. Certain purchases of Class A shares without a sales charge are subject to CDSC. The CDSC is not reflected in the performance shown. Please see the prospectus for more details.

Returns for less than one year are not annualized.

Instances of high double-digit returns were achieved primarily during favorable market conditions and may not be sustainable over time.

Not all share classes are available to all investors. Please see prospectus for more information.

GLOSSARY OF TERMS

Lipper Flexible Portfolio Funds Average is based on a universe of funds with similar investment objectives as the Fund. Peer group averages include the reinvested dividend and capital gains, if any, and exclude sales charges. Source: Lipper Analytical Services.

A Note about Risk: The Fund invests in underlying funds that may engage in a variety of investment strategies involving certain risks; the Fund is subject to the particular risks of an underlying fund in proportion to a respective investment. Performance of an underlying fund may be lower than the performance of the asset class it represents. The Fund is subject to risks associated with equity and fixed-income markets, as well as the financial condition and prospects of issuers in which the underlying funds invest. The value of investments in equity securities will fluctuate in response to general economic conditions and to changes in the prospects of particular companies and/or sectors in the economy. Investments in small and/or mid-sized company stocks typically involve greater risk, particularly in the short term, than those in larger, more established companies. Fixed income investments are subject to risks of default, interest-rate volatility, and illiquidity. These risks are greater for high yield bonds. Foreign securities may pose greater risks than domestic securities, including greater price fluctuation, less government regulation, and higher transaction costs. Foreign investments also may be affected by changes in currency rates or currency controls. These risks can be greater in the case of emerging country securities. The Fund is subject to the risks associated with derivatives, which may be different from and greater than the risks associated with investing directly in securities and other investments. These factors can affect Fund performance.

"Best Mutual-Fund Families," Barron's, February 8, 2014. In the Barron's/Lipper annual rankings of the best fund families, Lord Abbett Funds ranked 4 out of 64, 14 out of 55, and 15 out of 48 mutual fund families for the 1-, 5- and 10-year periods ending 12/31/2013, respectively. Rankings are based on asset weighted returns in funds in five categories: U.S. equity, world equity, mixed asset, taxable bond, and tax-exempt. Rankings also take into account an individual fund's performance within its Lipper peer group. Lipper calculated each fund's net total return for the year ended December 31, 2013, minus the effects of 12b-1 fees and sales charges. Each fund in the survey was given a percentile ranking with 100 the highest and 1 the lowest in its category. That ranking measured how a fund compared with its peer "universe," as tracked by Lipper, not just the funds in the survey. Individual fund scores were then multiplied by the 2013 weighting of their general classification as determined by the entire Lipper universe of funds. The process is repeated for the five- and ten-year rankings as well. Those fund scores were then totaled, creating an overall score and ranking for each fund family in each category.

Investors should carefully consider the investment objectives, risks, charges, and expenses of the Lord Abbett Funds.
