AVERAGE ANNUAL TOTAL RETURNS (%) AS OF 03/31/2019

CLASS A SHARES	YTD	1 YEAR	3 YEARS	5 YEARS	10 YEARS	EXPENSE RATIO ¹
Net Asset Value (without sales charge)	27.01	24.55	23.44	9.31	18.71	0.93%
Maximum Offering Price (with 5.75% sales charge)	19.73	17.41	21.02	8.03	18.01	

GROWTH OF \$10,000

Based on a hypothetical Class A Share investment of \$10,000 on 10/10/1973, at net asset value and includes the reinvestment of all distributions. Data as of 12/31/2018.

CALENDAR YEAR TOTAL RETURNS AT NAV (%)

	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018
NAV	47.03	36.54	-1.66	10.39	57.19	3.25	-8.90	-2.71	29.92	5.09

Reflects the percent change in net asset value (NAV) of Class A shares and includes the reinvestment of all distributions. Performance is shown for each calendar year. Performance of Class A shares with sales charge reflects the reinvestment of all distributions and includes initial maximum sales charge. Certain purchases of Class A shares without a sales charge are subject to CDSC. The CDSC is not reflected in the performance shown. Returns for less than one year are not annualized. Instances of high double-digit returns were achieved primarily during favorable market conditions and may not be sustainable over time.

Performance data quoted reflect past performance and are no guarantee of future results. Current performance may be higher or lower than the performance quoted. The investment return and principal value of an investment in the Fund will fluctuate so that shares, on any given day or when redeemed, may be worth more or less than their original cost. You can obtain performance data current to the most recent month-end by calling Lord Abbett at 888-522-2388 or referring to lordabbett.com.

The Developing Growth Fund is closed to new investors, with the exception of certain retirement and benefit plans and existing mutual funds advisory programs.

¹ Reflects expenses for the Fund's fiscal year end and is subject to change. Fund expenses may fluctuate with market volatility. A substantial reduction in Fund assets (since its most recently completed fiscal year), whether caused by market conditions or significant redemptions or both, will likely cause total operating expenses (as a percentage of Fund assets) to become higher than those shown.

² Reflects the average net expenses of Class A shares of all funds within the Lipper Small-Cap Growth Funds Category based on Lipper data available.

A Note about Risk: The value of investments in equity securities will fluctuate in response to general economic conditions and to changes in the prospects of particular companies, including market, liquidity, currency, and political risks. Small cap company stocks tend to be more volatile and may be less liquid than other types of stocks. Small cap companies may also have more limited product lines, markets, or financial resources and typically experience a higher risk of failure than large cap companies. Investments in growth companies can be more sensitive to the company's earnings and more volatile than the stock market in general. The Fund engages in active and frequent trading of its securities, which may result in increased transaction fees, reduced investment performance, and higher taxes. These factors can adversely affect Fund performance. The Fund's portfolio is actively managed and is subject to change.

SECTOR ALLOCATION

*The Russell 2000® Growth Index.

Sector allocations exclude cash therefore Fund percentage allocations may not equal 100%.

GLOSSARY OF TERMS

Weighted Average Market Capitalization is the average market capitalization of all companies held in the portfolio, with each company weighted according to its percent held in the portfolio. **Price/Earnings Ratio** is the weighted average of each holding's P/E ratio (price of a stock divided by its earnings per share). **Russell 2000® Growth Index** measures the performance of those Russell 2000 companies with higher price-to-book ratios and higher forecasted growth values. Index is unmanaged, does not reflect the deduction of fees or expenses; and is not available for direct investment.

Lipper Small-Cap Growth Funds Average is based on a universe of funds with similar investment objectives as the Fund. Source: Lipper Analytical Services.

† The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. Ratings do not take into account the effects of sales charges and loads.

Investors should carefully consider the investment objectives, risks, charges, and expenses of the Lord Abbett Funds.
