

# CREDIT OPPORTUNITIES FUND

## GOAL

The Fund seeks to deliver high current income and total return through a flexible strategy investing across a broad range of global fixed income sectors.

## FUND SYMBOLS/CUSIPS

Class I: LCRDX 54400C106

## FUND INFORMATION:

Inception Date: 02/22/2019

The Fund is structured as an unlisted closed-end interval fund. Limited liquidity is provided to shareholders only through the Fund's quarterly offers to repurchase between 5% and 25% of its outstanding shares at net asset value, subject to applicable law and approval of the Board of Trustees. The Fund currently expects to offer to repurchase 5% of outstanding shares per quarter. There is no secondary market for the Fund's shares and none is expected to develop. There is no guarantee that an investor will be able to tender all or any of their requested Fund shares in a periodic repurchase offer. Investors should consider shares of the Fund to be an illiquid investment.

Although the Fund may impose a repurchase fee of up to 2.00% on shares accepted for repurchase by the Fund that have been held for less than one year, the Fund does not currently intend to impose such a fee. Please refer to the Fund's prospectus for additional information.

The Fund's ability to be fully invested and achieve its investment objective may be affected by the need to fund repurchase obligations. In addition, the fees and costs associated with investing in an interval fund may be significantly greater than those of other fund structures.

## A Leader in Credit

An investment team with demonstrated capabilities across corporate credit and structured product sectors

## Flexible Approach

Flexibility to capture opportunities across multiple sectors of the global fixed income markets

## Expanded Opportunity Set

Potential for enhanced yield and return versus traditional fixed income by seeking to capitalize on opportunities in less liquid sectors of the market

## EXPANDED OPPORTUNITY SET

### AVERAGE ANNUAL TOTAL RETURNS (%) AS OF 06/30/2019

CLASS I SHARES	2Q 19	SINCE INCEPTION	EXPENSE RATIOS <sup>1</sup>	
			Gross	Net
Net Asset Value (without sales charge)	2.52	3.63	2.11%	1.50%

Reflects the percent change in net asset value (NAV) of Class I shares and includes the reinvestment of all distributions. Average Annual Total Returns are based on changes in the net asset value and assume reinvestment of all distributions and do not reflect deduction of any frontend sales charges which are not applicable for Class I shares. Returns for less than one year are not annualized.

**Performance data quoted reflect past performance and are no guarantee of future results. Current performance may be higher or lower than the performance quoted. The investment return and principal value of an investment in the Fund will fluctuate so that shares, on any given day or when redeemed, may be worth more or less than their original cost. You can obtain performance data current to the most recent month-end by calling Lord Abbett at 888-522-2388 or referring to lordabbett.com.**

<sup>1</sup> Reflects expenses for the Fund's fiscal year end and is subject to change. Fund expenses may fluctuate with market volatility. A substantial reduction in Fund assets (since its most recently completed fiscal year), whether caused by market conditions or significant redemptions or both, will likely cause total operating expenses (as a percentage of Fund assets) to become higher than those shown.

**New Fund Risk:** The Fund is newly organized. There can be no assurance that the Fund will reach or maintain a sufficient asset size to effectively implement its investment strategy.

**A Note about Risk:** The Fund is subject to the general risks associated with investing in debt securities, including market, credit, liquidity, and interest rate risk. The Fund may invest in high-yield, lower-rated securities, sometimes called junk bonds. These securities carry increased risks of price volatility, illiquidity, and the possibility of default in the timely payment of interest and principal. The Fund may invest in debt securities of stressed and distressed issuers as well as in defaulted securities and debtor-in-possession financings. Distressed and defaulted instruments generally present the same risks as investment in below investment grade instruments. However, in most cases, these risks are of a greater magnitude because of the uncertainties of investing in an issuer undergoing financial distress. The Fund may invest in foreign or emerging market securities, which may be adversely affected by economic, political, or regulatory factors and subject to currency volatility and greater liquidity risk. The Fund may invest in derivatives, which are subject to greater liquidity, leverage, and counterparty risk. These factors can affect Fund performance.

Because of the risks associated with the Fund's ability to invest in high yield securities, loans and related instruments and mortgage-related and other asset-backed instruments, foreign (including emerging market) securities (and related exposure to foreign currencies), and the Fund's ability to use leverage, an investment in the Fund should be considered speculative and involving a high degree of risk, including the risk of a substantial loss of investment.

Collateralized Loan Obligations (CLOs) may involve a high degree of risk. CLOs are exposed to risks such as credit, default, liquidity, management, volatility, interest rate and credit risk.

Special Situations includes distressed debt and other similar situations.

MBS and ABS stand for mortgage backed securities and asset backed securities respectively.

**PORTFOLIO BREAKDOWN**

Portfolio Breakdown excludes cash, therefore values may not add up to 100%.

**CREDIT QUALITY DISTRIBUTION**

Ratings (other than U.S. Treasury securities or securities issued or backed by U.S. agencies) provided by Standard & Poor's, Moody's, and Fitch. For certain securities that are not rated by any of these three agencies, credit ratings from other agencies may be used. Where the rating agencies rate a security differently, Lord Abbett uses the average rating based on numeric values assigned to each rating. Ratings range from AAA (highest) to D (lowest). Bonds rated BBB or above are considered investment grade. Credit ratings BB and below are lower-rated securities (junk bonds). High-yielding, non-investment-grade bonds (junk bonds) involve higher risks than investment-grade bonds. Adverse conditions may affect the issuer's ability to pay interest and principal on these securities. A portion of the portfolio's securities may not be rated. Breakdown is not an S&P credit rating or an opinion of S&P as to the creditworthiness of such portfolio. Ratings apply to the creditworthiness of the issuers of the underlying securities and not the fund or its shares. Ratings may be subject to change.

**GLOSSARY OF TERMS**

**Effective Duration** is the change in the value of a fixed-income security that will result from a 1% change in market interest rates, taking into account anticipated cash flow fluctuations from mortgage prepayments, puts, adjustable coupons, and potential call dates. Duration is expressed as a number of years, and generally, the larger a duration, the greater the interest-rate risk or reward for a portfolio's underlying bond prices. Where applicable, securities, such as common or preferred stock, convertible bonds and convertible preferred stock, ETFs and ADRs and futures, are excluded from these calculations.

**Average Maturity** is the length of time until the average security in a portfolio will mature or be redeemed by its issuer in proportion to its dollar value. Indicating a portfolio's sensitivity to general market interest rate changes, a longer average maturity implies greater relative portfolio volatility.

**Class I Shares are available only to institutional investors and certain others, including retirement plans, as described in the prospectus.**
