AVERAGE ANNUAL TOTAL RETURNS (%) AS OF 06/30/2026

CLASS A SHARES	YTD	1 YEAR	3 YEARS	5 YEARS	10 YEARS	EXPENSE RATIOS[1]	
Net Asset Value (without sales charge)	1.71	6.20	7.27	1.94	4.41	Gross	Adjusted[†]
Maximum Offering Price (with 2.25% sales charge)	-0.61	3.75	6.45	1.46	4.17	0.96%	0.79%

GROWTH OF $10,000

Based on a hypothetical Class A Share investment of $10,000 on 04/01/1971, at net asset value and includes the reinvestment of all distributions. Data as of 12/31/2025.

CALENDAR YEAR TOTAL RETURNS AT NAV (%)

	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025
NAV	12.35	9.21	-3.79	13.37	7.60	3.26	-12.68	6.85	6.77	8.39

Reflects the percent change in net asset value (NAV) of Class A shares and includes the reinvestment of all distributions. Performance is shown for each calendar year. Performance of Class A shares with sales charge reflects the reinvestment of all distributions and includes initial maximum sales charge. Certain purchases of Class A shares without a sales charge are subject to a contingent deferred sales charge (CDSC). The CDSC is not reflected in the performance shown. Returns for less than one year are not annualized. Instances of high double-digit returns were achieved primarily during favorable market conditions and may not be sustainable over time.

Performance data quoted reflect past performance and are no guarantee of future results. Current performance may be higher or lower than the performance quoted. The investment return and principal value of an investment in the Fund will fluctuate so that shares, on any given day or when redeemed, may be worth more or less than their original cost. You can obtain performance data current to the most recent month-end by calling Lord Abbett at 888-522-2388 or referring to lordabbett.com.

Barron's Top Fund Families of 2025, February 26, 2026, Lord Abbett Funds ranked 5 out of 45, 13 out of 42, 9 out of 42 mutual fund families within the overall category for the 1-, 5- and 10-year periods ending 12/31/2025, respectively.

The Bond Debenture Fund A share rankings within the Lipper Multi-Sector Income Funds Average as of 06/30/2026 for the one-year time period was 19% (74/398); five-year, 66% (223/340); and 10-year, 17% (40/240). Source: Lipper Analytical Services. Lipper Funds Average ranking reflect all share classes within the category and are based on total return and do not reflect the effect of sales charges.

[1]Reflects expenses for the Fund's fiscal year end and is subject to change. Fund expenses may fluctuate with market volatility. A substantial reduction in Fund assets (since its most recently completed fiscal year), whether caused by market conditions or significant redemptions or both, will likely cause total operating expenses (as a percentage of Fund assets) to become higher than those shown.

[2]Reflects the average net expenses of Class A shares of all funds within the Lipper Multi-Sector Income Funds Category based on Lipper data available.

Risks to Consider: The Fund is subject to the general risks associated with investing in debt securities, including market, credit, liquidity, and interest rate risk. The value of your investment will change as interest rates fluctuate and in response to market movements. When interest rates fall, the prices of debt securities tend to rise, and when interest rates rise, the prices of debt securities are likely to decline. Longer-term debt securities are usually more sensitive to interest-rate changes; the longer the maturity of a security, the greater the effect a change in interest rates is likely to have on its price. The Fund may make substantial investments in high-yield debt securities and may invest in senior loans which may be primarily below-investment grade. High-yield securities, sometimes called junk bonds, carry increased risks of price volatility, illiquidity, and the possibility of default in timely payment of interest and expenses. The value of investments in equity securities will fluctuate in response to general economic conditions and to changes in the prospects of particular companies and/or sectors in the economy. Convertible securities are subject to the risks affecting both equity and fixed income securities, including market, credit, liquidity, and interest rate risk. These factors can affect Fund performance.

Barron's Disclosure: Used with permission. ©2026 Dow Jones & Company, Inc. Source: "Barron's Best Fund Families of 2025," February 26, 2026. Barron's rankings are based on asset weighted returns in funds in five categories: general equity, world equity (including international and global portfolios), mixed asset (which invest in stocks, bonds and other securities), taxable bond, and tax-exempt (each a "Barron's ranking category"). Rankings also take into account an individual fund's performance within its Lipper peer universe. Lipper calculated each fund's net total return for the year ended December 31, 2025, minus the effects of 12b-1 fees and sales charges. Each fund in the survey was given a percentile ranking with 100 the highest and 1 the lowest in its category. That ranking measured how a fund compared with its peer "universe," as tracked by Lipper, not just the funds in the survey. Individual fund scores were then multiplied by the 2025 weighting of their Barron's ranking category as determined by the entire Lipper universe of funds. Those fund scores were then totaled, creating an overall score and ranking for each fund family in the survey in each Barron's ranking category. The process is repeated for the five- and ten-year rankings as well.

The Fund's portfolio is actively managed and is subject to change.

PORTFOLIO BREAKDOWN

Allocations are reported as of the date a security transaction is initiated; however, certain transactions may not settle until several days later. Accordingly, cash may appear as a negative allocation as a result of unsettled transactions. If applicable, "Other" may include municipal bonds and non-index holdings.

CREDIT QUALITY DISTRIBUTION

Ratings (other than U.S. Treasury securities or securities issued or backed by U.S. agencies) provided by Standard & Poor's, Moody's, and Fitch. For certain securities that are not rated by any of these three agencies, credit ratings from other agencies may be used. Where the rating agencies rate a security differently, Lord Abbett uses the best credit rating. Ratings range from AAA (highest) to D (lowest). Bonds rated BBB or above are considered investment grade. Credit ratings BB and below are lower-rated securities (junk bonds). High-yielding, non investment grade bonds (junk bonds) involve higher risks than investment grade bonds. Adverse conditions may affect the issuer's ability to pay interest and principal on these securities. A portion of the portfolio's securities may not be rated. Breakdown is not an S&P credit rating or an opinion of S&P as to the creditworthiness of such portfolio. Ratings apply to the creditworthiness of the issuers of the underlying securities and not the fund or its shares. Ratings may be subject to change.

GLOSSARY OF TERMS

Average Effective Duration is the change in the value of a fixed income security that will result from a 1% change in market interest rates, taking into account anticipated cash flow fluctuations from mortgage prepayments, puts, adjustable coupons, and potential call dates. Duration is expressed as a number of years, and generally, the larger a duration, the greater the interest-rate risk or reward for a portfolio's underlying bond prices. Where applicable, securities, such as common or preferred stock, convertible bonds and convertible preferred stock, ETFs and ADRs, and CPI swaps and related futures, are excluded from these calculations. **Average Effective Maturity** is the weighted average of all the maturities of the securities held in a fund. The maturity of a security is the length of time until final payment is due, or if applicable, an earlier date based on relevant factors such as maturity-shortening devices. Indicating a portfolio's sensitivity to general market interest rate changes, a longer average maturity implies greater relative portfolio volatility. **Lipper Multi-Sector Income Funds Average** is based on a universe of funds with similar investment objectives as the Fund. Source: Lipper Analytical Services.

Asset-Backed Security (ABS) is a financial security backed by a loan, lease or receivables against assets other than real estate and mortgage-backed securities. For investors, asset-backed securities are an alternative to investing in corporate debt.

Mortgage-Backed Security (MBS) is a variation of asset-backed securities that are formed by pooling together mortgages exclusively.

Collateral Loan Obligation (CLO) is a special purpose vehicle (SPV) with securitization payments in the form of different tranches. Financial institutions back this security with receivables from loans. Collateralized loan obligations are the same as collateralized mortgage obligations (CMOs) except for the assets securing the obligation. CLOs allow banks to reduce regulatory capital requirements by selling large portions of their commercial loan portfolios to international markets, reducing the risks associated with lending.

Commercial Mortgage-Backed Security (CMBS) is a type of mortgage-backed security that is secured by the loan on a commercial property. A CMBS can provide liquidity to real estate investors and to commercial lenders. As with other types of MBS, the increased use of CMBS can be attributable to the rapid rise in real estate prices over the years.
