Important Information

Separately managed accounts may not be suitable for all investors. This information should not be relied upon as investment advice or a recommendation for any particular investment product or strategy and is provided for informational purposes only. It is important for investors to review their investment objectives, risk tolerance, tax liability, and liquidity needs before choosing an investment style or manager. Investors should consult with their financial advisors before making any investment decisions.

The information contained herein is provided on the basis and subject to the explanations, caveats, and warnings set out in this notice and elsewhere herein. Any discussion of risk management is intended to describe Lord Abbett's efforts to monitor and manage risk but does not imply low risk.

These materials do not purport to provide any legal, tax, or accounting advice.

The credit quality ratings of securities in the portfolio are assigned by a nationally recognized statistical rating organization (NRSRO), such as Standard & Poor's, Moody's, or Fitch, as an indication of an issuer's creditworthiness. Where the rating agencies rate a security differently, Lord Abbett uses the higher credit rating. Ratings range from 'AAA' (highest) to 'D' (lowest). Bonds rated 'BBB' or above are considered investment grade. Credit ratings 'BB' and below are lower-rated securities (junk bonds). High-yielding, non-investment-grade bonds (junk bonds) involve higher risks than investment-grade bonds. Adverse conditions may affect the issuer's ability to pay interest and principal on these securities. Breakdown is not an S&P credit rating or an opinion of S&P as to the creditworthiness of such portfolio.

A Note about Risk: As interest rates rise, the prices of debt securities tend to fall; as rates fall, prices tend to rise. The value of a portfolio will change as interest rates fluctuate. Municipal securities may include insured municipal securities that are covered by insurance policies that guarantee the timely payment of principal and interest. Insurance does not pertain to yield or market values, which will fluctuate over the life of bonds. Income from municipal bonds may be subject to the alternative minimum tax. Federal, state, and local taxes may apply. Although these are the main risks of investing in bonds, there may be other risks associated with investing in bonds, such as credit, inflation, call, high-yield, and market risks. An investor should consult with his or her investment professional before making an investment decision.
