Reflects the percent change in net asset value (NAV) of Class A shares and includes the reinvestment of all distributions. Performance is shown for each calendar year. Performance of Class A shares with sales charge reflects the reinvestment of all distributions and includes initial maximum sales charge. Certain purchases of Class A shares without a sales charge are subject to a contingent deferred sales charge (CDSC). The CDSC is not reflected in the performance shown. Returns for less than one year are not annualized. Instances of high double-digit returns were achieved primarily during favorable market conditions and may not be sustainable over time.

Performance data quoted reflect past performance and are no guarantee of future results. Current performance may be higher or lower than the performance quoted. The investment return and principal value of an investment in the Fund will fluctuate so that shares, on any given day or when redeemed, may be worth more or less than their original cost. You can obtain performance data current to the most recent month-end by calling Lord Abbett at 888-522-2388 or referring to lordabbett.com.

1Reflects expenses for the Fund's fiscal year end and is subject to change. Fund expenses may fluctuate with market volatility. A substantial reduction in Fund assets (since its most recently completed fiscal year), whether caused by market conditions or significant redemptions or both, will likely cause total operating expenses (as a percentage of Fund assets) to become higher than those shown.

2Reflects the average net expenses of Class A shares of all funds within the Lipper High Yield Funds Category based on Lipper data available.

A Note about Risk: The Fund is subject to the general risks associated with investing in debt securities, including market, credit, liquidity, and interest rate risk. The Fund invests primarily in high-yield, lower-rated securities, sometimes called junk bonds. These securities carry increased risks of price volatility, illiquidity, and the possibility of default in the timely payment of interest and principal. The Fund may invest in foreign or emerging market securities, which may be adversely affected by economic, political, or regulatory factors and subject to currency volatility and greater liquidity risk. The Fund may invest in derivatives, which are subject to greater liquidity, leverage, and counterparty risk. These factors can affect Fund performance.

The Fund's portfolio is actively managed and is subject to change.

PORTFOLIO BREAKDOWN

| High Yield Bonds | 91.1% |
| Bank Loans | 5.1% |
| Equity | 3.6% |
| Investment Grade Bonds | 0.7% |
| Convertibles | 0.5% |
| Other | 0.0% |
| Cash | -1.0% |

Allocations are reported as of the date a security transaction is initiated; however, certain transactions may not settle until several days later. Accordingly, cash may appear as a negative allocation as a result of unsettled transactions. If applicable, "Other" may include municipal bonds and non-index holdings.

CREDIT QUALITY DISTRIBUTION

- BBB 0.7%
- BB 39.7%
- B 45.8%
- <B 12.6%
- Not Rated 1.1%

Ratings (other than U.S. Treasury securities or securities issued or backed by U.S. agencies) provided by Standard & Poor’s, Moody’s, or Fitch. For certain securities that are not rated by any of these three agencies, credit ratings from other agencies may be used. Where the rating agencies rate a security differently, Lord Abbett uses the average rating based on numeric values assigned to each rating. Ratings range from AAA (highest) to D (lowest). Bonds rated BBB or above are considered investment grade. Credit ratings BB and below are lower-rated securities (junk bonds). High-yielding, non-investment-grade bonds (junk bonds) involve higher risks than investment-grade bonds. Adverse conditions may affect the issuer’s ability to pay interest and principal on these securities. A portion of the portfolio’s securities may not be rated. Breakdown is not an S&P credit rating or an opinion of S&P as to the creditworthiness of such portfolio. Ratings apply to the creditworthiness of the issuers of the underlying securities and not the fund or its shares. Ratings may be subject to change.

GLOSSARY OF TERMS

Effective Duration is the change in the value of a fixed income security that will result from a 1% change in market interest rates, taking into account anticipated cash flow fluctuations from mortgage prepayments, puts, adjustable coupons, and potential call dates. Duration is expressed as a number of years, and generally, the larger a duration, the greater the interest-rate risk or reward for a portfolio’s underlying bond prices. Where applicable, securities, such as common or preferred stock, convertible bonds and convertible preferred stock, ETFs and ADRs, and CBO swaps and related futures, are excluded from these calculations. Average Maturity is the length of time until the average security in a portfolio will mature or be redeemed by its issuer in proportion to its dollar value. Indicating a portfolio’s sensitivity to general market interest rate changes, a longer average maturity implies greater relative portfolio volatility. Lipper High Yield Funds Average is based on a universe of funds with similar investment objectives as the Fund. Source: Lipper Analytical Services.
