EMERGING MARKETS CORPORATE DEBT FUND

OVERALL MORNINGSTAR RATING‡

★★★★★

Morningstar rated the Lord Abbett Emerging Markets Corporate Debt Fund class A share 4, 4 and 5 stars among 226, 213 and 110 Emerging Markets Bond Funds for the overall rating and the 3, 5 and 10 year periods ended 12/31/2023, respectively. Morningstar Rating for other share classes may have different performance characteristics. Morningstar ratings are based on risk-adjusted returns and do not take into account the effect of sales charges and loads. See additional information on next page. © 2023 Morningstar, Inc. AVERAGE ANNUAL TOTAL RETURNS (%) AS OF 12/31/2023

CLASS A SHARES	1 YEAR	3 YEARS	5 YEARS	10 YEARS	EXPENSE RATIOS[1]	
					Gross	Net[†]
Net Asset Value (without sales charge)	6.96	-1.83	2.59	3.48		
Maximum Offering Price (with 2.25% sales charge)	4.52	-2.56	2.13	3.25	1.44%	1.05%

CALENDAR YEAR TOTAL RETURNS AT NAV (%)

	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023
NAV	6.76	1.77	9.03	8.54	-3.65	13.56	5.78	-0.39	-11.19	6.96

Reflects the percent change in net asset value (NAV) of Class A shares and includes the reinvestment of all distributions. Performance is shown for each calendar year. Performance of Class A shares with sales charge reflects the reinvestment of all distributions and includes initial maximum sales charge. Certain purchases of Class A shares without a sales charge are subject to a contingent deferred sales charge (CDSC). The CDSC is not reflected in the performance shown. Returns for less than one year are not annualized. Instances of high double-digit returns were achieved primarily during favorable market conditions and may not be sustainable over time.

Performance data quoted reflect past performance and are no guarantee of future results. Current performance may be higher or lower than the performance quoted. The investment return and principal value of an investment in the Fund will fluctuate so that shares, on any given day or when redeemed, may be worth more or less than their original cost. You can obtain performance data current to the most recent month-end by calling Lord Abbett at 888-522-2388 or referring to lordabbett.com.

[1]Reflects expenses for the Fund's fiscal year end and is subject to change. Fund expenses may fluctuate with market volatility. A substantial reduction in Fund assets (since its most recently completed fiscal year), whether caused by market conditions or significant redemptions or both, will likely cause total operating expenses (as a percentage of Fund assets) to become higher than those shown.

[2]Reflects the average net expenses of Class A shares of all funds within the Lipper Emerging Mrkts Hard Currency Debt Funds Category based on Lipper data available.

A Note about Risk: The Fund is subject to the general risks associated with investing in debt securities, including market, credit, liquidity, and interest rate risk. Investing in the bond market is also subject to issuer, call, and inflation risk; investments may be worth more or less than the original cost when redeemed. Bonds issued or guaranteed by foreign governments and governmental entities (commonly referred to as "sovereign debt") present risks not associated with investments in other types of bonds. The sovereign government or governmental entity issuing or guaranteeing the debt may be unable or unwilling to make interest payments and/or repay the principal owed. The Fund is subject to risks associated with its investments in emerging market securities. Foreign investments generally pose greater risks than domestic investments. The securities markets of emerging market countries tend to be less liquid, to be especially subject to greater price volatility, to have a smaller market capitalization, and to have less government regulation. Investing in foreign denominated and/or domiciled securities may involve heightened risk due to currency fluctuations, and economic and political risks, which may be increased in emerging markets. The Fund may invest substantially in derivatives, which are subject to certain risks such as liquidity, market, and counterparty risk and the risk that a position could not be closed when most advantageous. Investing in derivatives could cause the Fund to lose more than the amount invested. High-yield, lower-rated securities involve greater credit risk, price volatility, illiquidity, and default risk than higher-rated securities. These factors can affect Fund performance. The Fund's portfolio is actively managed and is subject to change.

FUND BASICS

Total Net Assets ($M):[3] $31.7
Inception Date: 12/31/2013 (Class A)
Capital Gains Distribution: December
Dividend Frequency: Monthly
Minimum Initial Investment: $1,000

[3]Includes all share classes.

EXPENSE RATIOS[1]	GROSS	NET[†]
Class A:	1.44%	1.05%
Class C:	2.07%	1.68%
Class F:	1.34%	0.95%
Class F3:	1.09%	0.70%
Class I:	1.24%	0.85%
Class R3:	1.74%	1.35%
Class R4:	1.49%	1.10%
Class R5:	1.24%	0.85%
Class R6:	1.09%	0.70%

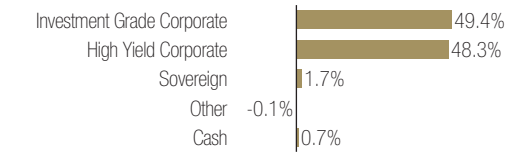

[†]The net expense ratio takes into account contractual fee waivers/expense reimbursements that currently are scheduled to remain in place through 04/30/2024. For periods when fees and expenses were waived and/or reimbursed, the Fund benefited by not bearing such expenses. Without such fee waivers/reimbursements, performance would have been lower.

TEN LARGEST HOLDINGS

Teva Pharmaceutical Finance Netherlands III BV	1.8%	OCP SA	1.4%
Ooredoo International Finance Ltd	1.7%	Standard Chartered PLC	1.3%
CK Hutchison International 21 Ltd	1.6%	Eskom Holdings SOC Ltd	1.3%

Saudi Arabian Oil Co	1.4%	MISC Capital Two Labuan Ltd	1.2%

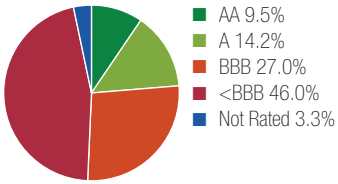

Holdings are for informational purposes only and are not a recommendation to buy, sell, or hold any security.

PORTFOLIO BREAKDOWN

Allocations are reported as of the date a security transaction is initiated; however, certain transactions may not settle until several days later. Accordingly, cash may appear as a negative allocation as a result of unsettled transactions. If applicable, "Other" may include municipal bonds and non-index holdings.

CREDIT QUALITY DISTRIBUTION

Ratings (other than U.S. Treasury securities or securities issued or backed by U.S. agencies) provided by Standard & Poor's, Moody's, and Fitch. For certain securities that are not rated by any of these three agencies, credit ratings from other agencies may be used. Where the rating agencies rate a security differently, Lord Abbett uses the median, but if there are only two ratings, the lower rating is used. Ratings range from AAA (highest) to D (lowest). Bonds rated BBB or above are considered investment grade. Credit ratings BB and below are lower-rated securities (junk bonds). High-yielding, non-investment-grade bonds (junk bonds) involve higher risks than investment-grade bonds. Adverse conditions may affect the issuer's ability to pay interest and principal on these securities. A portion of the portfolio's securities may not be rated. Breakdown is not an S&P credit rating or an opinion of S&P as to the creditworthiness of such portfolio. Ratings apply to the creditworthiness of the issuers of the underlying securities and not the fund or its shares. Ratings may be subject to change.

GLOSSARY OF TERMS

Effective Duration is the change in the value of a fixed income security that will result from a 1% change in market interest rates, taking into account anticipated cash flow fluctuations from mortgage prepayments, puts, adjustable coupons, and potential call dates. Duration is expressed as a number of years, and generally, the larger a duration, the greater the interest-rate risk or reward for a portfolio's underlying bond prices. Where applicable, securities, such as common or preferred stock, convertible bonds and convertible preferred stock, ETFs and ADRs, and CPI swaps and related futures, are excluded from these calculations.

Average Maturity is the length of time until the average security in a portfolio will mature or be redeemed by its issuer in proportion to its dollar value. Indicating a portfolio's sensitivity to general market interest rate changes, a longer average maturity implies greater relative portfolio volatility.

Lipper Emerging Mrkts Hard Currency Debt Funds Average is based on a universe of funds with similar investment objectives as the Fund. Source: Lipper Analytical Services.

[‡]The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. Ratings do not take into account the effects of sales charges and loads.

Investors should carefully consider the investment objectives, risks, charges, and expenses of the Lord Abbett Funds.
