

## GROWTH LEADERS FUND

## INNOVATION GROWTH INVESTING

*The Fund seeks to invest in transformative market-leading companies with high return potential while managing opportunity and risk through an active approach.*

## INNOVATION

This active growth strategy seeks to own stocks of innovative companies growing revenues substantially faster than the overall market, which can deliver attractive investment returns.

## EXPERIENCED INVESTMENT TEAM

The team leverages a long history of growth investing across all market capitalizations with the ability to combine fundamental research and technical analysis to manage both opportunity and risk.

## NOTEWORTHY TRACK RECORD

Our active approach has produced a compelling track record of delivering strong returns versus the Morningstar Large Growth Category.

## STRONG LONG-TERM RETURNS VERSUS MORNINGSTAR LARGE GROWTH CATEGORY

**AVERAGE ANNUAL TOTAL RETURNS AT THE MAXIMUM 5.75% SALES CHARGE APPLICABLE TO CLASS A SHARE INVESTMENTS AS OF 12/31/2019, INCLUDING THE REINVESTMENT OF ALL DISTRIBUTIONS:**  
1 YEAR: 27.00%; 5 YEARS: 12.10%; SINCE INCEPTION\*\*\*: 13.26%. EXPENSE RATIO: 0.91%

**The performance quoted represents past performance, which is no indication of future results. Current performance may be higher or lower than the performance data quoted. The investment return and principal value of an investment in the Fund will fluctuate so that shares, on any given day or when redeemed, may be worth more or less than the original cost. You can obtain performance data current to the most recent month-end by calling Lord Abbett at 888-522-2388 or referring to lordabbett.com.**

\*All results are calculated in accordance with the SEC mandated standard methodology, but do not reflect deduction of any front-end sales charges (which are waived for certain defined contribution plans and certain mutual fund advisory programs.) If those charges were deducted, the returns would be lower. All results are based on changes in net asset value and assume reinvestment of all distributions. Instances of high double-digit returns were achieved primarily during favorable market conditions and may not be sustainable over time. Class A Shares purchased subject to a front-end sales charge have no contingent deferred sales charge (CDSC). However, certain purchases of Class A Shares made without a front-end sales charge may be subject to a CDSC of 1% if the shares are redeemed before the first day of the month in which the one-year anniversary of the purchase falls. The CDSC is not reflected in the Average Annual Total Returns. If the CDSC was included, performance would be lower. Please see the Prospectus for more information on redemptions that may be subject to a CDSC. Indexes are unmanaged, do not reflect the deduction of fees or expenses, and are not available for direct investment. \*\*Source: Morningstar. Morningstar Category average returns are based on all share classes within the category and include the reinvested dividends and capital gains, if any, and exclude sales charges. \*\*\*Inception Date: 06/30/2011.

The value of investments in equity securities will fluctuate in response to general economic conditions and to changes in the prospects of particular companies and/or sectors in the economy.

## COMPETITIVE PERFORMANCE & LOW EXPENSES IN MORNINGSTAR LARGE GROWTH CATEGORY

Growth of \$10,000 (06/30/2011 - 12/31/2019)

Low Expenses

Source: Morningstar. Data as of 12/31/2019. Data for the Lord Abbett Growth Leaders Fund is based on Class A Share investment at net asset value and includes the reinvestment of all distributions, but does not reflect the deduction of sales charges which would lower performance.

For the period from March 1, 2019 through February 29, 2020, Lord Abbett Distributor LLC has contractually agreed to waive the Fund's 0.10% Rule 12b-1 fee for Class F shares. This agreement may be terminated only by the Fund's Board of Trustees.

**A Note about Risk:** The value of investments in equity securities will fluctuate in response to general economic conditions and to changes in the prospects of particular companies, including market, liquidity, currency, and political risks. Mid- and small-cap company stocks tend to be more volatile and may be less liquid than large-cap company stocks. Mid- and small-cap companies may also have more limited product lines, markets, or financial resources and typically experience a higher risk of failure than large companies. However, larger companies may have slower rates of growth than smaller successful companies. Investments in growth companies can be more sensitive to the company's earnings and more volatile than the stock market in general. The Fund engages in active and frequent trading of its securities, which may result in increased transaction fees, reduced investment performance, and higher taxes. These factors can adversely affect Fund performance.

**Class A Shares** purchased subject to a front-end sales charge have no contingent deferred sales charge (CDSC). However, certain purchases of Class A shares made without a front-end sales charge may be subject to a CDSC of 1% if the shares are redeemed before the first day of the month in which the one year anniversary of the purchase falls. The CDSC is not reflected in the performance with maximum sales charge.

The **Russell 1000<sup>®</sup> Growth Index** measures the performance of those Russell 1000 companies with higher price-to-book ratios and higher forecasted growth values.

The **S&P 500<sup>®</sup> Index** is widely regarded as the standard for measuring large-cap U.S. stock market performance and includes a representative sample of leading companies in leading industries. Index is unmanaged, does not reflect the deduction of fees or expenses, and is not available for direct investment.

**Morningstar Category Average Expense Ratios** reflect the average net expenses of Class A shares of all funds within the peer group based on Morningstar data available.

**Morningstar Large Growth Category:** includes funds that seek capital appreciation by investing in large domestic stocks that are growth-oriented. Large-cap stocks have market capitalizations greater than \$5 billion. Growth is defined based on high price/book and price/cash flow ratios. Funds will typically have more than 70% of assets invested in U.S. stocks.

**Fund Expense Ratio Details:** Reflects expenses for the Fund's fiscal year-end and is subject to change. Fund expenses may fluctuate with market volatility. A substantial reduction in Fund assets (since its most recently completed fiscal year), whether caused by market conditions or significant redemptions or both, will likely cause total operating expenses (as a percentage of Fund assets) to become higher than those shown.
