GROWTH OF \$10,000

Based on a hypothetical Class A Share investment of \$10,000 on 01/02/1991, at net asset value and includes the reinvestment of all distributions. Data as of 12/31/2014.

CALENDAR YEAR TOTAL RETURNS AT NAV (%)

	2005	2006	2007	2008	2009	2010	2011	2012	2013	2014
NAV	3.65	4.11	-0.55	-15.02	22.23	1.04	10.42	10.73	-5.99	12.07

Reflects the percent change in net asset value (NAV) of Class A shares and includes the reinvestment of all distributions. Performance is shown for each calendar year. Past performance is no guarantee of future results.

Performance data quoted reflect past performance and are no guarantee of future results. Current performance may be higher or lower than the performance quoted. The investment return and principal value of an investment in the Fund will fluctuate so that shares, on any given day or when redeemed, may be worth more or less than their original cost. You can obtain performance data current to the most recent month-end by calling Lord Abbett at 888-522-2388 or referring to lordabbett.com.

¹ The Fund's portfolio is actively managed and is subject to change. Please see Important Information for portfolio characteristics and breakdown methodology.

² The 30 Day Standardized Yield represents net investment income earned by a fund over a 30-day period. It is expressed as an annual percentage rate using a method of calculation adopted by the Securities and Exchange Commission (SEC). Yields for other share classes will vary.

Without sales charge (NAV): the net asset value performance above shows the Fund's average annual total returns excluding sales charges. If sales charges, including any applicable contingent deferred sales charge (CDSC) had been included, performance would have been lower.

With sales charge (MOP): performance of Class A shares with sales charge reflects the reinvestment of all distributions and includes initial maximum sales charge. Certain purchases of Class A shares without a sales charge are subject to CDSC. The CDSC is not reflected in the performance shown. Please see the prospectus for more details.

Returns for less than one year are not annualized.

Instances of high double-digit returns were achieved primarily during favorable market conditions and may not be sustainable over time.

Not all share classes are available to all investors. Please see prospectus for more information.

MATURITY BREAKDOWN

The Fund's portfolio is actively managed and is subject to change. Maturity breakdowns exclude cash and futures and therefore Fund percentage allocations may not equal 100%. Please see Important Information for portfolio characteristics and breakdown methodology.

CREDIT QUALITY DISTRIBUTION

Ratings provided by Standard & Poor's and Moody's. Where S&P and Moody's rate a security differently, Lord Abbett uses the higher credit rating. For a security with both a short-term and long-term rating, Lord Abbett has categorized the security in the chart above using its short-term rating. Ratings range from AAA (highest) to D (lowest). Bonds rated BBB or above are considered investment grade. Credit ratings BB and below are lower-rated securities (junk bonds). High-yielding, non investment grade bonds (junk bonds) involve higher risks than investment grade bonds. Adverse conditions may affect the issuer's ability to pay interest and principal on these securities. A portion of the portfolio's securities are not rated. The credit quality breakdown is not an S&P credit rating or an opinion of S&P as to the creditworthiness of such portfolio. Credit quality allocation reflects market value weightings. Ratings apply to the credit worthiness of the issuers of the underlying securities and not the fund or its shares. Ratings may be subject to change.

GLOSSARY OF TERMS

Effective Duration is the change in the value of a fixed income security that will result from a 1% change in market interest rates, taking into account anticipated cash flow fluctuations from mortgage prepayments, puts, adjustable coupons, and potential call dates. Duration is expressed as a number of years, and generally, the larger a duration, the greater the interest-rate risk or reward for a portfolio's underlying bond prices. Where applicable, securities, such as common or preferred stock, convertible bonds and convertible preferred stock, ETFs and ADRs and futures, are excluded from these calculations.

Average Effective Maturity is the length of time until the average security in a portfolio will mature or be redeemed by its issuer in proportion to its dollar value. Indicating a portfolio's sensitivity to general market interest rate changes, a longer average maturity implies greater relative portfolio volatility.

Important Information: The portfolio characteristics and maturity breakdown exclude characteristics of any securities that are distressed or in default. Such securities comprised 0.07% of the fund as of 12/31/2014.

A Note about Risk: The Fund invests a significant percentage of its assets in the securities of a single state. As a result, an investment in the Fund may be riskier than an investment in other, more diversified municipal bond funds. The value of an investment in the Fund will change as interest rates fluctuate in response to market movements. When interest rates rise, the prices of debt securities are likely to decline, and when interest rates fall, the prices of debt securities tend to rise. High-yield securities, sometimes called "junk bonds" carry increased risks of price volatility, illiquidity, and the possibility of default in the timely payment of interest and principal. A portion of the income derived from the Fund's portfolio may be subject to the alternative minimum tax. Any capital gains realized may be subject to taxation. Federal, state, and local taxes may apply. There is a risk that a bond issued as tax-exempt may be reclassified by the IRS as taxable, creating taxable rather than tax-exempt income. The Fund may invest in bonds of issuers in Puerto Rico and other U.S. territories, commonwealths, and possessions, and may be affected by local, state, and regional factors. These may include, for example, economic or political developments, erosion of the tax base, and the possibility of credit problems. These factors can affect Fund performance.

"Best Mutual-Fund Families," Barron's, February 8, 2014. In the Barron's/Lipper annual rankings of the best fund families, Lord Abbett Funds ranked 4 out of 64, 14 out of 55, and 15 out of 48 mutual fund families for the 1-, 5- and 10- year periods ending 12/31/2013, respectively. Rankings are based on asset weighted returns in funds in five categories: U.S. equity, world equity, mixed asset, taxable bond, and tax-exempt. Rankings also take into account an individual fund's performance within its Lipper peer group. Lipper calculated each fund's net total return for the year ended December 31, 2013, minus the effects of 12b-1 fees and sales charges. Each fund in the survey was given a percentile ranking with 100 the highest and 1 the lowest in its category. That ranking measured how a fund compared with its peer "universe," as tracked by Lipper, not just the funds in the survey. Individual fund scores were then multiplied by the 2013 weighting of their general classification as determined by the entire Lipper universe of funds. The process is repeated for the five- and ten-year rankings as well. Those fund scores were then totaled, creating an overall score and ranking for each fund family in each category.
