Reflects the percent change in net asset value (NAV) of Class A shares and includes the reinvestment of all distributions. Performance is shown for each calendar year. Past performance is no guarantee of future results.

Performance data quoted reflect past performance and are no guarantee of future results. Current performance may be higher or lower than the performance quoted. The investment return and principal value of an investment in the Fund will fluctuate so that shares, on any given day or when redeemed, may be worth more or less than their original cost. You can obtain performance data current to the most recent month-end by calling Lord Abbett at 888-522-2388 or referring to lordabbett.com.

¹ Reflects expenses for the Fund's fiscal year end and is subject to change. Fund expenses may fluctuate with market volatility. A substantial reduction in Fund assets (since its most recently completed fiscal year), whether caused by market conditions or significant redemptions or both, will likely cause total operating expenses (as a percentage of Fund assets) to become higher than those shown.

² Reflects the average net expenses of Class A shares of all funds within the Lipper International Multi-Cap Core Category based on Lipper data available.

Without sales charge (NAV): the net asset value performance above shows the Fund's average annual total returns excluding sales charges. If sales charges, including any applicable contingent deferred sales charge (CDSC) had been included, performance would have been lower.

With sales charge (MOP): performance of Class A shares with sales charge reflects the reinvestment of all distributions and includes initial maximum sales charge. Certain purchases of Class A shares without a sales charge are subject to CDSC. The CDSC is not reflected in the performance shown. Please see the prospectus for more details.

Returns for less than one year are not annualized.

Instances of high double-digit returns were achieved primarily during favorable market conditions and may not be sustainable over time.

Not all share classes are available to all investors. Please see prospectus for more information.

The Fund's portfolio is actively managed and is subject to change.

¹ The net expense ratio takes into account contractual fee waivers/expense reimbursements that currently are scheduled to remain in place through 02/28/2018. For periods when fees and expenses were waived and/or reimbursed, the Fund benefited by not bearing such expenses. Without such fee waivers/reimbursements, performance would have been lower.

GLOSSARY OF TERMS

Weighted Average Market Capitalization is the average market capitalization of all companies held in the portfolio, with each company weighted according to its percent held in the portfolio. **Price/Earnings Ratio** is the weighted average of each holding's P/E ratio (price of a stock divided by its earnings per share). The MSCI makes no express or implied warranties or representations and shall have no liability whatsoever with respect to any MSCI data contained herein. The MSCI data may not be further redistributed or used as a basis for other indices or any securities or financial products. This report is not approved, reviewed or produced by MSCI.

The MSCI EAFE Index (Europe, Australasia, Far East) is a free float-adjusted market capitalization index that is designed to measure the equity market performance of developed markets, excluding the U.S. & Canada. The MSCI EAFE Index consists of the following 21 developed market country indices: Australia, Austria, Belgium, Denmark, Finland, France, Germany, Hong Kong, Ireland, Israel, Italy, Japan, the Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, and the United Kingdom.

Lipper International Multi-Cap Core Funds Average is based on a universe of funds with similar investment objectives as the Fund. Peer group averages include the reinvested dividend and capital gains, if any, and exclude sales charges. Source: Lipper Analytical Services.

A Note about Risk: The value of investments in equity securities will fluctuate in response to general economic conditions and to changes in the prospects of particular companies and/or sectors in the economy. The foreign securities in which the Fund primarily invests generally pose greater risks than domestic securities, including greater price fluctuations and higher transaction costs. Foreign investments also may be affected by changes in currency rates or currency controls. With respect to certain foreign countries, there is a possibility of nationalization, expropriation or confiscatory taxation, imposition of withholding or other taxes, and political or social instability that could affect investments in those countries. These risks can be greater in the case of emerging country securities. Investments in either growth or value stocks may shift in and out of favor for long periods of time, depending on market and economic conditions. The Fund is subject to the risks associated with derivatives, which may be different from and greater than the risks associated with investing directly in securities and other investments. These factors can affect Fund performance.

Investors should carefully consider the investment objectives, risks, charges, and expenses of the Lord Abbett Funds.
